5	DESIGN	5 DAYS	7TH MARCH
6	ERROR CORRECTION	2 DAYS	9TH MARCH
7	TESTING	1 DAY	12TH MARCH

INTRODUCTION

What is a website?

The definition of a website is an entity containing one or more web pages and associated content that can be accessed via the internet.

A website is a collection of related information about topics, typically maintained by a single organization or group, with all the information on one central site.

A website includes webpages and documents that are typically accessible over the Internet using a unique domain name.

The term may also refer to any collection of interactive digital media and devoted to providing such materials as films, electronic books, online games, music videos etc. The World Wide Web is the most popular network website media of all time.

OVERVIEW

My love for movies inspired the website. Finding a good website to stream movies online is kind of difficult to come by, so I have taken it upon myself to create a movie streaming website.

AIM

The aim of this project is to make streaming movies online easy to access and use.

PROJECT SCOPE/ OBJECTIVES

In the course of the project development, series of steps and processes will be taken into consideration.

RESEARCH

During this phase, I scavenged the internet looking and studying various popular movie websites for responsiveness, design, function and interface.

DATA ANALYSIS AND PRESENTATION

During this phase, I laid out all of the data and information I collected during the research phase.

Making a decision on what measure to take and how to implement it to bring life to my project. Collecting of measures, means, solutions and ways to achieve my goal.

IDENTIFYING PROBLEMS AND PROVIDING ACCURATE SOLUTIONS

Running into errors is inevitable with this website, solving these errors is another thing altogether. In this phase, the use of alternate approaches came in handy. Researching and brainstorming solutions to the errors.

DESIGN

In this phase, the design for my website included researching the colors to blend to come out presentable and uniform. I got a couple of themes to implement in my code from popular websites like Netflix.

PROJECT IMPLEMENTATION

During this phase we will be preparing the various facilities for the implementation of the project. This include hardware and software structure in place. Implementing various coordination to ensure smooth creating.

TESTING

In this phase, creating a test plan document on how to approach my testing face. Configuration of software and hardware devices in preparation of the testing procedures. And finally testing the finishing product and documentation of a report on the testing procedures.

REPORT

In this phase, I wrote down my observation of the functions my website could run. Taking down notes of every change or modification I made to the website.

SYSTEM REQUIREMENTS

SYSTEM REQUIREMENTS (DEVELOPMENT)

The following are the system requirements needed for the development:

- An Integrated Development Environment (Android Studio)
- CSS
- HTML
- Java(language)
- Internet Access
- Computer

SYSTEM REQUIREMENTS (RUNNING)

The following are the requirements needed deploy and use the application.

- A Computer
- Internet Access
- Browser

FUNCTIONAL REQUIREMENTS

Functional requirement defines a function of a system or its component. Functional requirements may involve calculations, technical details, data manipulation and processing, and other specific functionality that define what a system is supposed to accomplish.

(Wikipedia, 2021)

Function requirement are component request the user(s). The following are the functional requirement for the movie streaming website

- The website will be able to stream movies
- The website will be able to refresh feed for new or latest movies
- The website will be able to determine the genre of a movie
- The website will be able to play movies and tv series

INTRODUCTION

Analysis is process of breaking down a something into its part to learn what they do and how they relate to one another.

(Your Dictionary, 2021)

This section contains facts and reasons why certain implementations, devices and programming languages and methods where used in the development of the website which include the deployment device, programming language and IDE using a balance score sheet system.

DEPLOYMENT DEVICE (GRADING FROM 1-5)

REQUIREMENT	WINDOWS
USEABILITY	5
AVAILABILITY	5
SCALABILITY	5
SECURITY	5
MAINTENANCE	5

TOTAL	25

From the table, a windows computer was the best device for the website to be deployed on.

INTEGRATED DEVELOPMENT ENVIRONMENT (GRADING FROM 1 – 5)

REQUIREMENT	BRACKETS	NOTEPAD++	VISUAL STUDIO CODE
USEABILITY	3	2	5
PERFORMANCE	3	1	5
TOTAL	**6**	**3**	**10**

From the balance sheet, Visual Studio Code was the best Integrated Development Environment(IDE).
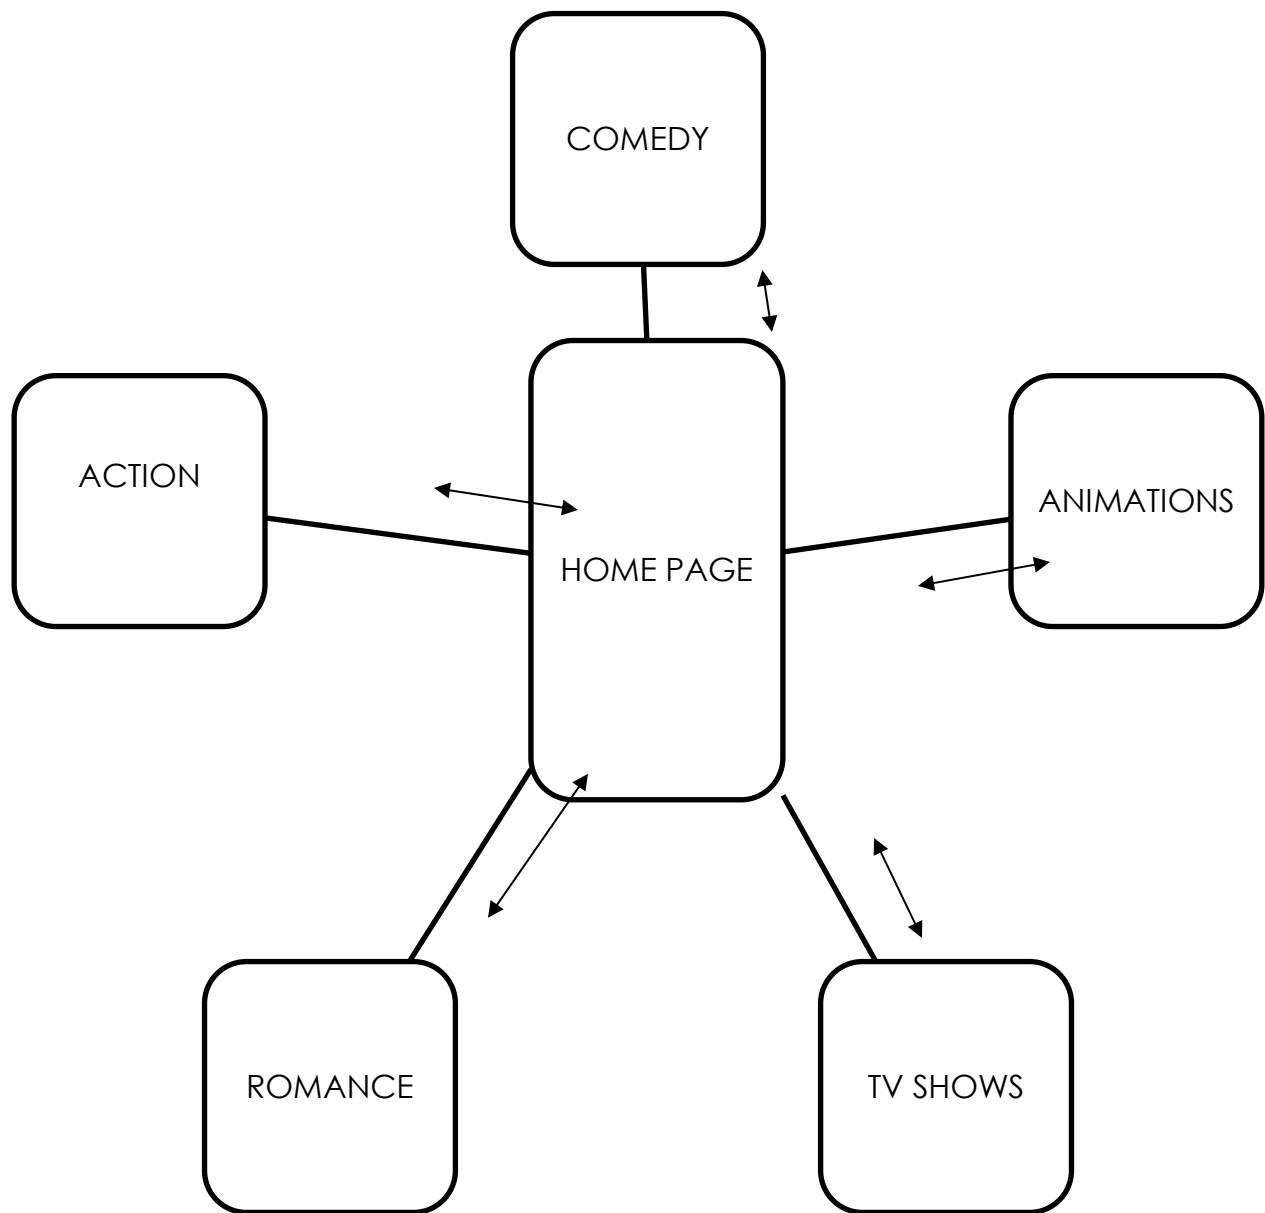

HOME PAGE LAYOUT

The main page layout serves as the home page of the website. It holds and displays movies of all genres. It contains the following features and functions:

- Movie Cards: This is the wallpaper for specific movies
- Search Bar: This is used to input keywords to find movies
- Header: This houses the various movie genres, the search bar and the title of the website

COMEDY PAGE LAYOUT

The comedy page layout is a one of the sub-set pages of the website. It holds and displays movies in the comedy genre. It contains the following features and functions:

- Movie Cards: This is the wallpaper for comedy movies
- Search Bar: This is used to input keywords to find movies
- Header: This houses the various movie genres, the search bar and the title of the website

ANIMATIONS PAGE LAYOUT

The animations page layout is a one of the sub-set pages of the website. It holds and displays movies in the comedy genre. It contains the following features and functions:

- Movie Cards: This is the wallpaper for animations movies
- Search Bar: This is used to input keywords to find movies
- Header: This houses the various movie genres, the search bar and the title of the website

HORROR PAGE LAYOUT

The horror page layout is a one of the sub-set pages of the website. It holds and displays movies in the comedy genre. It contains the following features and functions:

- Movie Cards: This is the wallpaper for horror movies
- Search Bar: This is used to input keywords to find movies
- Header: This houses the various movie genres, the search bar and the title of the website

TV SHOWS PAGE LAYOUT

The tv shows page layout is a one of the sub-set pages of the website. It holds and displays movies in the comedy genre. It contains the following features and functions:

- Movie Cards: This is the wallpaper for tv shows movies
- Search Bar: This is used to input keywords to find movies
- Header: This houses the various movie genres, the search bar and the title of the website

ROMANCE PAGE LAYOUT

The romance page layout is a one of the sub-set pages of the website. It holds and displays movies in the comedy genre. It contains the following features and functions:

- Movie Cards: This is the wallpaper for romantic movies
- Search Bar: This is used to input keywords to find movies

- Header: This houses the various movie genres, the search bar and the title of the website

ACTION PAGE LAYOUT

The action page layout is a one of the sub-set pages of the website. It holds and displays movies in the comedy genre. It contains the following features and functions:

- Movie Cards: This is the wallpaper for action movies
- Search Bar: This is used to input keywords to find movies
- Header: This houses the various movie genres, the search bar and the title of the website

Architectural Design

ERD Diagram
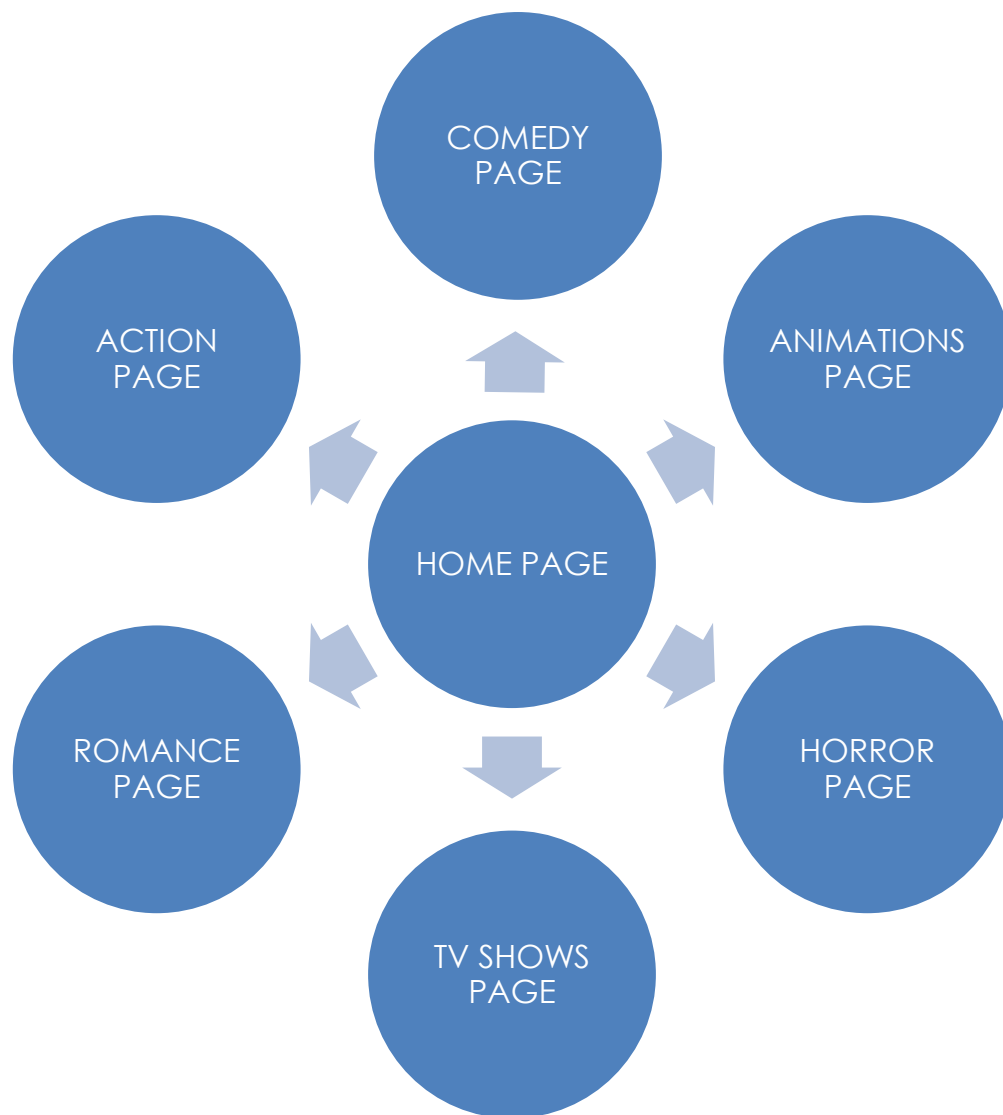

IMPLEMENTATIONS

INTRODUCTION

Implementation is the process that turns strategies and plans into actions in order to accomplish strategic objectives and goals.

(OnStrategy, 2021)

This section contains steps and measures taken in the designing and implementation of the application.

Step One: Once you launch the website, it takes you to the showcase section also known as Home.
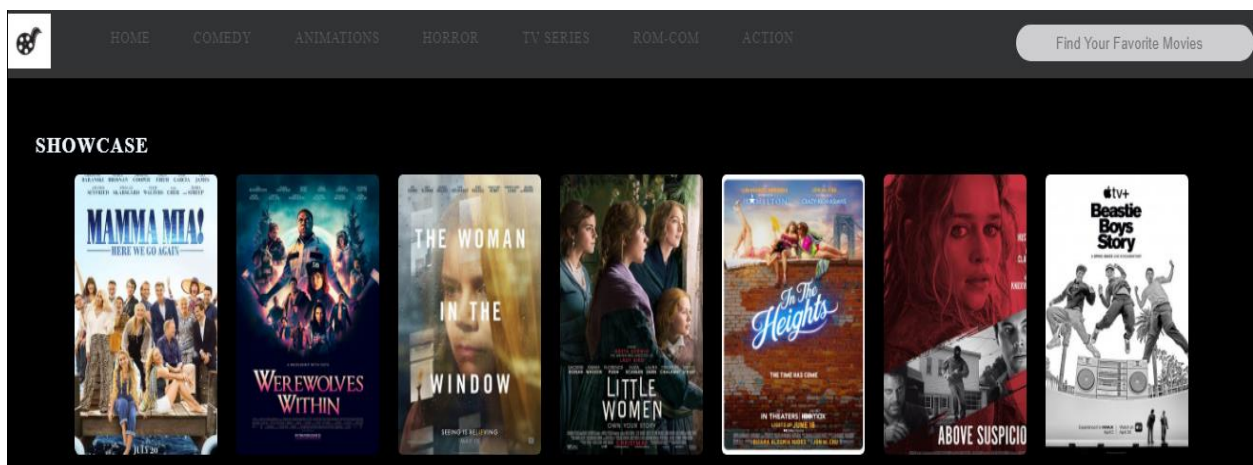

Step Two: To go to the Comedy section of the website you click on the Comedy button on the top nav bar.
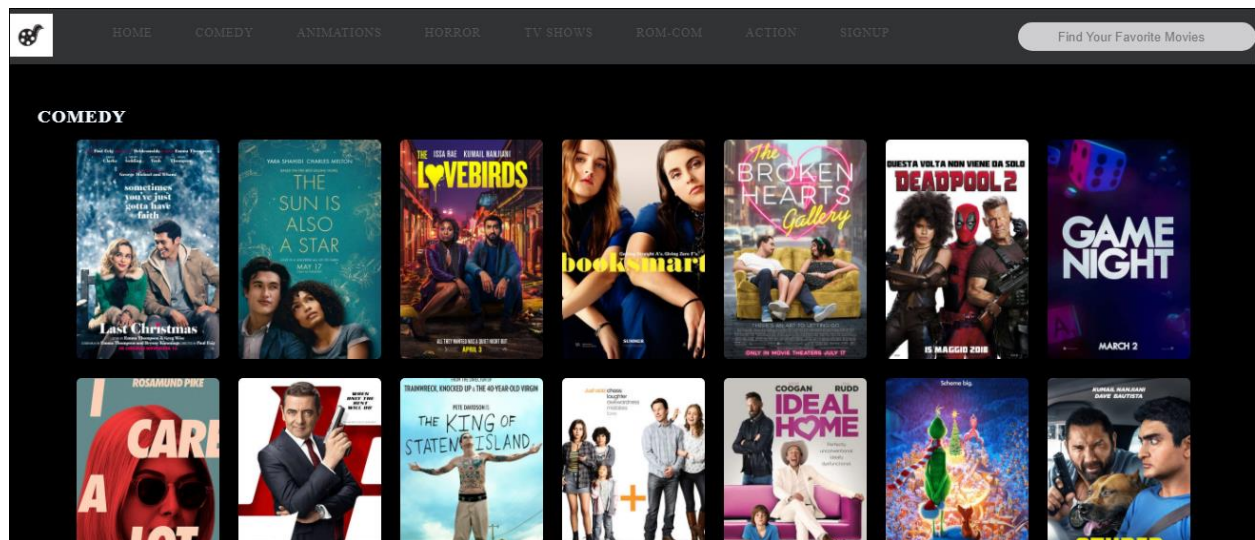

Step Three: To go to animations, you click on the animations button on the top navigation bar
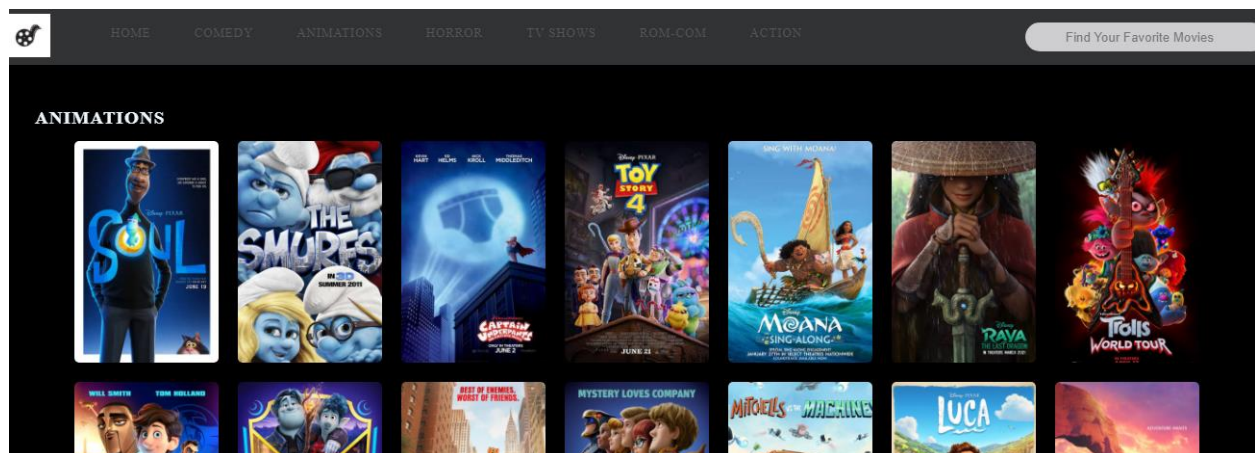

Step Four: To go the Horror section of the website, you click on the horror button on the top navigation bar.
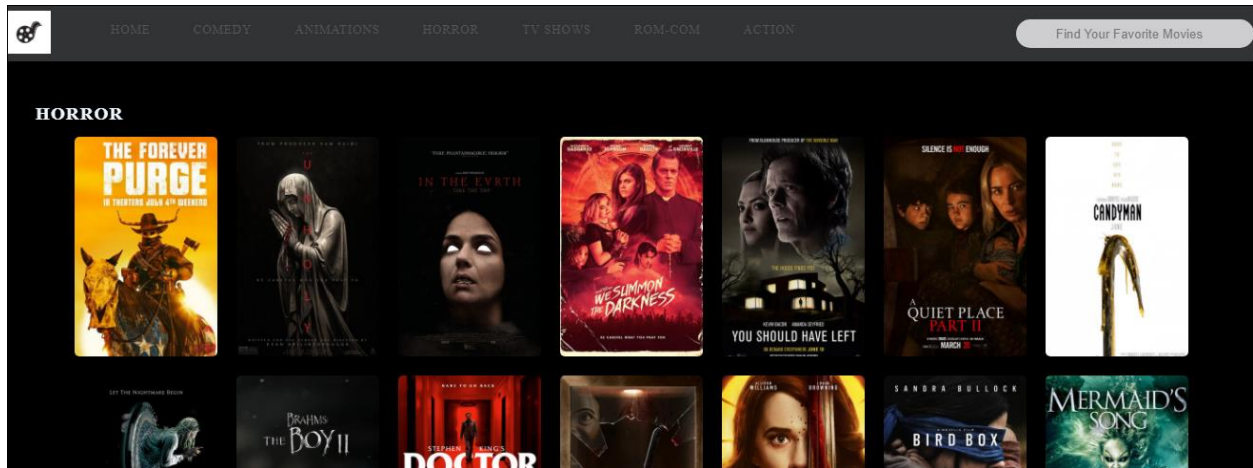

Step Five: Click on the Tv Shows button to got to the Tv Shows section of the website.
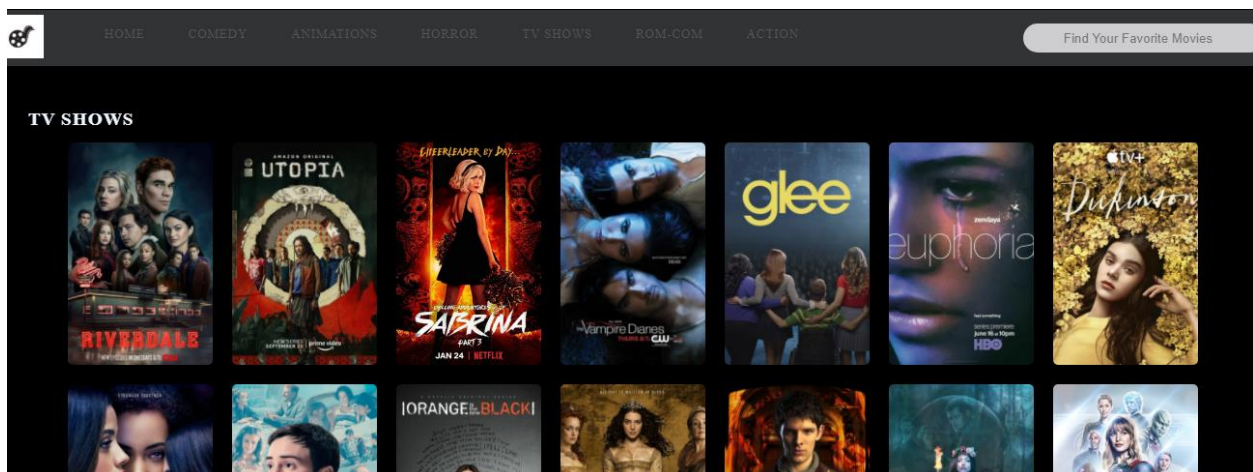

Step Six: To visit the Romance section, you click on the romance button on the top navigation bar.
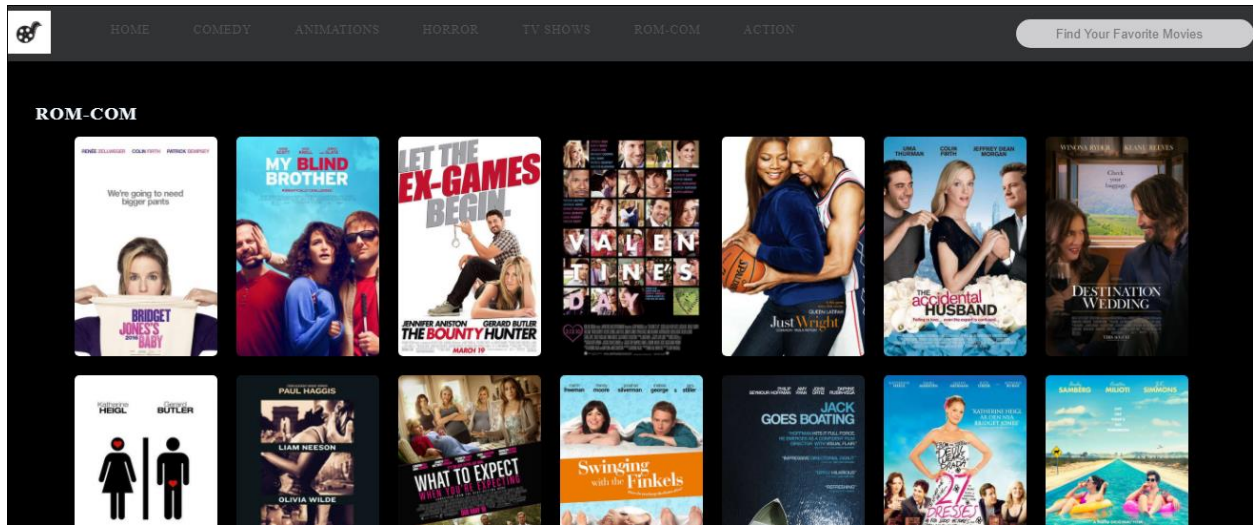

Step Seven: Click on the action button to visit the action movies section of the website.
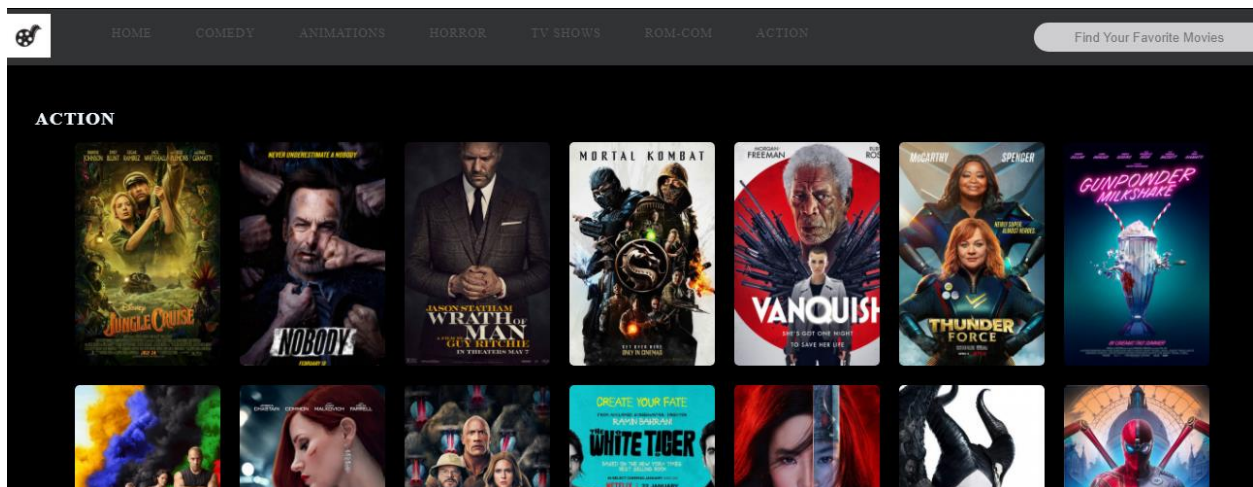

PROJECT TESTING.

The movie website was tested in one phase.

TEST NO	REQUIRED OUTCOME	EXPECTED OUTCOME	RESULTS
1	Item should be highlighted	Hover created	Passed
2	Movie card should be active when the pointer hovers	Movie Card was active when being hovered on	Passed
3	New Text note should be saved	New note was saved	Passed

GLOSSARY

WORD	MEANING
DIV	The **div tag** is known as Division **tag**. The **div tag** is used in **HTML** to make divisions of content in the web page like (text, images, header, footer, navigation bar, etc). **Div tag** has both open(** **) and closing (** **) **tag** and it is mandatory to close the **tag**.
NAVIGATION BAR	A web browser **navigation bar** includes the back and forward buttons, as well as the Location **bar** where URLs are entered.
WEBSITE	A website is a collection of web pages and related content that is identified by a common domain name and published on at least one web server.
MOVIE CARD	A movie card is a poster used to promote and advertise a film primarily to persuade paying customers into a theater to see it.
MOVIE	a cinema film.
CSS	Cascading Style Sheets is a style sheet language used for describing the presentation of a document written in a markup language such as HTML.
JAVA	A programming language that produces software for multiple platform
HTML	The HyperText Markup Language, or HTML is the standard markup language for documents designed to be displayed in a web browser.
GENRE	Genre is any form or type of communication in any mode with socially-agreed-upon conventions developed over time.
WEB BROWSER	A web browser is application software for accessing the World Wide Web.
IDE	Integrated Development Environment a software used for writing and testing of applications or software.
LAYOUT	The way in which the part of something are arranged or laid out.
